

# SOVEREIGN GROUP

How Sovereign Group received £2,700 from the Green Business Fund to help pay for new heating controls

Sovereign Group has received £2,700 to part fund the installation of a new heating controls system delivering gas savings of £4,900 per year.

Sovereign Group is a manufacturer and installer of bespoke windows and doors for Local Authorities, Housing Associations, Health Trusts, schools, colleges and universities. They employ 180 staff and are based in Lancashire.

The web enabled system helps Sovereign Group to implement good house keeping procedures such as introducing an Optimised Stop Programme to gradually reduce the ambient temperature in the last hour of the working day.

“The application process was very well laid out and straight forward with easy to follow guides. Once we had made the application the response was swift, we had approval within 2 weeks and the money in our bank within 2 weeks of commissioning of the project. All in all, a great scheme.”
