

# FINE CUT GROUP

How Fine Cut Group will be saving over £2,200 each year

By implementing a Carbon Trust recommendation, Fine Cut Ltd have reduced their energy bills by £2,200 every year.

Fine Cut Group is one of the UK's leading providers of labelling and marking solutions. They supply to a variety of industries; from medical to aerospace, defence and motorsport industries, they fulfil a diverse range of labelling requirements.

Following an application to the Carbon Trust Green Business Fund for an onsite energy assessment, paid for by the Green Business Fund, the Carbon Trust expert that visited Fine Cut identified some key opportunities to save energy and associated carbon emissions.

One of these recommendations included replacing an aged gas boiler to a more energy efficient sealed filled condensed boiler.

Fine Cut Group went on to install a new boiler and expect to save £2,200 each year.

Furthermore, Fine Cut have been offered a rebate from the Carbon Trust's Green Business Fund of £2,200.

“From the first call, right through to completion; the team were friendly and really informative, and made it so easy! The application was simple; fast, and professional.”

Sam Urben, Project Coordinator, Fine Cut Group
