

THE GREEN BUSINESS FUND FROM THE CARBON TRUST

WHAT IS **IMPLEMENTATION ADVICE** AND HOW CAN SMES IN ENGLAND, WALES AND SCOTLAND BENEFIT FROM IT?

Implementation advice is one of the support services offered by the Carbon Trust Green Business Fund, provided at no cost to businesses with up to 1000 employees.

The advice helps businesses in England, Scotland and Wales to adopt the best energy efficiency recommendations that have been made by a reputable supplier or consultant.

After undergoing an energy assessment to highlight the ways in which your business could save on energy costs (such as investing in new lighting, upgraded heating equipment, or a better air conditioning system), implementation advice can help you find reputable suppliers who will install the specified equipment for your business needs.

Implementation Advice:

- Designed to support businesses with specific energy-saving projects in mind (e.g. lighting, heating, etc.)
- Provides up to five days of funded bespoke support from a Carbon Trust consultant at no cost to your business
- Available for companies with up to 1,000 employees in England, Scotland or Wales

Support covers:

- Impartial design and specification of a project
- Development of invitation to tender documents, so supplier bids are structured and compared fairly in a competitive tender process
- Sourcing and shortlisting reliable suppliers
- An independent review of supplier proposals and quotes
- Advice and support throughout the buying process
- Peace of mind for your business that the equipment you are buying is fit for purpose and right for your needs
