

OFFSHORE WIND ACCELERATOR S4Y7

Clarification Question Responses

TWG-F – The New Definitions of Design Gusts (DDG) project

26 August 2026

#	Type	Question	Response
1	Project specific	Could the Carbon Trust clarify whether the project objectives would be better served by using publicly available reference models, which support transparency and reproducibility, or by using adapted reference models calibrated to be more representative of current industrial offshore turbine designs?	We are happy for bidders to propose using either a public open-source reference model or a calibrated adapted reference model. In your bid submission please give details of your chosen approach and why you have selected it.
